

The dot plot displays the frequency of scores. The y-axis represents the score values, ranging from 8 to 14. A horizontal yellow line is drawn at the score of 10. The data points are represented by grey circles, with the size of each circle indicating its frequency. The score of 8 has the highest frequency, represented by a large yellow circle. The scores 12 and 14 have the lowest frequencies, each represented by a single grey circle.

Score	Frequency
8	10
9	1
10	1
11	1
12	1
13	1
14	1

A scatter plot showing the distribution of a variable. The y-axis is labeled from 0 to 3. A horizontal yellow line is drawn at y=1.5. The data points are clustered around y=1.5, with a large yellow circle at the center (1.5, 1.5).
