

The dot plot displays the frequency of scores. The y-axis represents the score values (8, 10, 12, 14). The x-axis represents the frequency of each score. A horizontal yellow line is drawn at y=10. The data points are as follows:

Score	Frequency (Number of Dots)
7	1
8	10
9	2
10	3
11	2
12	1
13	2
14	2
15	1

The dot plot displays the distribution of scores for the 'number' variable. The y-axis ranges from 40 to 80. A horizontal yellow line is drawn at a score of 59. The data points are represented by grey dots, with a large yellow dot at the score of 77, indicating a high frequency or outlier.

A scatter plot with a vertical axis labeled from 0 to 3. A horizontal yellow line is drawn at y = 1.5. Data points are represented by gray circles of varying sizes, clustered vertically at x = 0.5. A large yellow circle highlights a point at approximately (0.5, 1.0).
